Good Morning,

Thank you! I will add both the Sergeants to our running attendance lists.

Yes, both classes are being held at CPD.

Respectfully,
Gianna

Good Morning Marty,

The Cambridge Police Department is hosting a UASI-funded *Drug IQ - Law Enforcement Synthetic Opioid Risk-Based Response* 8-hour training, and we would like to offer two seats to HUPD for both the June 20 and July 25th classes.

Please find below and attached additional information regarding the class. We have requested from our officers that they submit their training requests by Friday May 31st so that any remaining seats can be offered to outside agencies.

I have cc'd Gianna. Please let us know if there is interest in sending any of your officers to this training. Depending upon the in-house interest, we may be able to offer additional seats as well.

Thanks,
Tom

Subject: Drug IQ - Law Enforcement Synthetic Opioid Risk-Based Response

Good Afternoon,

On Thursday June 20th from 8:00am to 4:00pm, and again on Thursday July 25th from 8:00am to 4:00pm, the Cambridge Police Department will be hosting a UASI-funded *Drug IQ - Law Enforcement Synthetic Opioid Risk-Based Response* 8-hour training, being presented by instructors from Federal Recourses, a well-respected company out of Maryland: https://www.federalresources.com/. Based on the attached Course Description, the training is 50% of risk-based response tactics in the classroom setting, and 50%hands-on.

We were able to secure and host two training sessions, and spaced them out, in part, to allow opportunities for both Night Platoons to attend. For the June 20th class, the Third Platoon is not on their short-day, and likewise on July 25th, the Second Platoon is not on a short-day. Another reason for the date selection was the availability (see the below testimonials) of the two instructors who will be training: *Matt Gutwill and Mike Cashman.*

Please submit the attached 190A Training Request Form through your Chain-of-Command and cc PDTrainingAndCertification if you have interest in attending. In order to secure your seat, the deadline for submission of your Training Request is Friday May 31st. If there are remaining seats available, we will open it up to partnering agencies.

Respectfully,
Lieutenant Flynn

bcc: All PD Sworn Officers

Testimonials:
Somerville Fire Lt. Francis Otting: Special Operations, Liaison to MBHSR Homeland Security
"In my opinion, the instructors make this incredibly powerful training. Matt Gutwill and Mike Cashman, are THE GUYS to talk to about synthetic opioids and hash labs/dispensaries/grow facilities. Matt spent years working undercover for DEA moving drugs and laundering money. He was so good the Saudis called him the Egyptian Magician because they couldn't guess his ethnicity. Cashman was a Marine Recon officer and spent his entire career post-military with the DEA working clan lab response across the country. The class will be 50% hands on with skill-based learning you can apply immediately."

Everett Police Captain Paul Hamilton
"The drug scenes that we are all so often called to today, are no longer just a safety and life threatening issue for the subject concerned but for the Police Officers, Fire Fighters, and EMS personnel as well. It's scary to think that just by simply walking into these scenes to provide care that you are exposing yourself to life threatening conditions. It is imperative that the information provided in this training become routine information for all personnel that will be exposed to these types of hazards."

Quincy Police Lieutenant Bob Gillan
"The course material is expedient and needs to be trained on across police, fire and EMS. Overdoses and interaction with unidentified substances have become routine. Take this course to learn how to better protect yourself and gain the upper hand in dealing with a synthetic opioid incident. 50% of the training is hands-on instruction - no wasted time."
